

Computing Group Project

PUSL2021

UNIVERSITY OF
PLYMOUTH

Project Initial Idea

Group B - 58

❖ Group Members and Details.

Name	Role	Plymouth ID
Kahandawa Appuhamilage Sewmina Anupa Kahandawa	Project and Group Leader	10899225
Adhikari Mudiyansele Sameera Dilshan Senevirathne	Planning Leader	10899366
Wickramasinghe Mudiyansele Upeksha Nethmi Wickramasinghe	Quality Leader	10899381
Karunapala Uyanwaththage Don Larnoth Darshana	Technical Leader	10899202
Arambage Ashan Udaraka	Testing and Maintenance Leader	10899377
Bishan Adiptha Ranamuka	Programming Leader	10898677

❖ **Initial Idea About the Project.**

We suggest creating a cutting-edge, gender-neutral mobile salon application driven by AI. Users of this app will be able to choose from a variety of makeover options, including hair, nails, eyebrows, and beards, and then utilize AI to see these changes on their own images. The four makeover recommendations are tailored to the user's preferred style and category. This project intends to engage a varied audience interested in experimenting with different appearances and trends by placing a strong emphasis on user-friendliness, data security, and substantial AI integration. A diverse team is working on design, development, testing, and deployment over a period of 5 to 6 months. With the help of this project, users will have the ability to experiment with their appearance in a fun and creative way, revolutionizing the salon experience.
